

Women in Power region8 (Tunisia Section)

Info session report

On the 17th of April, I joined the IEEE PES ENIS student brunch chapter as a Women in power region8 representative for an info session.

The session was animated by amazing PES volunteers. It included the four ambassadors and two PES DAY organizers (a webmaster and a designer). It aimed to inform members about the history, goals and mission of the IEEE power and energy society in order to highlight the importance of PES DAY. It also aimed to introduce them to the women in power initiative, how it is recognizing amazing women in the energy fields and how it is helping its members through programs such as find a mentor, become a mentee and through its webinar archive.
